WORK EXPERIENCE

Tech Access Learning Pvt Ltd

Android App Developer

June-2024 - July-2024

- Designed and developed app screens and workflows using Activities and Fragments, implemented login functionality with the Android SDK in Android Studio, and built rich, user-friendly UI modules using ListView, ScrollView, Navigation Drawer, and custom views.

Sellar(StartUp)

Reactjs + TypeScript Developer

December-2025- - Present

- I am currently working as an intern at a startup as a React + TypeScript developer, where I contribute to building and improving modern web applications. I focus on developing scalable UI components and enhancing overall user experience.

EDUCATION

Don Bosco Institute of Technology

Bachelor of Computer Applications (BCA) - 8.11

8.11

PROJECTS

Company Portfolio(Sellar's Portfolio) [🔗](#)

- I designed and developed the company's portfolio website using React and TypeScript, focusing on creating a modern, responsive, and user-friendly interface. I worked on building reusable components, improving performance, and ensuring a smooth overall user experience across different devices.

Catalogue App [🔗](#)

- I am currently developing a fully authenticated, high-level catalogue application for my company using React.js and TypeScript. The project focuses on building a secure, scalable, and performance-optimized platform with a clean architecture and a smooth user experience tailored to business needs.

Portfolio Website [🔗](#)

- A modern and responsive portfolio website that showcases my full-stack development skills through real-world projects, clean UI/UX design, and efficient coding practices. It highlights my technical strengths, problem-solving approach, and hands-on experience with the latest web technologies.

Task Manager Website [🔗](#)

- Created a full-stack Task Manager with JWT authentication, protected routes, and CRUD task operations. Integrated MongoDB Atlas, optimized backend APIs, and built a responsive React UI with reusable components for a seamless user experience.

Pinterest Clone [🔗](#)

- Developed a Pinterest-like full-stack app with user authentication, image upload, and dynamic content rendering. Built secure APIs for uploading, saving, and managing images, and implemented responsive EJS pages. Integrated MongoDB for scalable storage and smooth UI flow.

Todo App [🔗](#)

- Developed a Todo app with Redux-based state management, supporting add, edit, delete, and filter options. Implemented localStorage for persistent data and built a clean, responsive UI.

SKILLS

- Frontend: HTML, CSS, JavaScript, ReactJS, Bootstrap
- Backend: Node.js, PHP, Express.js, MySQL, MongoDB
- Programming language: C, C++, Java, Python
- Tools: Git, GitHub, VS Code
