WORK EXPERIENCE

Tech Access Learning Pvt Ltd

Android App Developer

June-2024 - July-2024

- Designed and developed app screens and workflows using Activities and Fragments, implemented login functionality with the Android SDK in Android Studio, and built rich, user-friendly UI modules using ListView, ScrollView, Navigation Drawer, and custom views.

Sellar(StartUp)

Reactjs + TypeScript Developer

December-2025 - Present

- I am currently working as an intern at a startup as a React + TypeScript developer, where I contribute to building and improving modern web applications. I focus on developing scalable UI components and enhancing overall user experience.

EDUCATION

Don Bosco Institute of Technology

Bachelor of Computer Applications (BCA) - 8.11

PROJECTS

Company Portfolio(Sellar's Portfolio) [🔗](#)

- Developed a responsive company portfolio website using React.js and TypeScript with reusable components, modern UI/UX design, and optimized performance. Ensured smooth navigation and seamless compatibility across desktop and mobile devices.

Catalogue App [🔗](#)

- Built a scalable catalogue management application using React.js and TypeScript with authentication, dynamic product management, and reusable UI components. Implemented search, filtering, and responsive layouts to improve overall user experience.

Portfolio Website [🔗](#)

- Developed a modern personal portfolio website using React.js to showcase projects, technical skills, and development experience with responsive design principles. Implemented reusable components, smooth navigation, and optimized UI performance to deliver an engaging user experience.

Task Manager Website [🔗](#)

- Developed a full-stack Task Manager application with JWT authentication, protected routes, CRUD functionality, and MongoDB integration.

Pinterest Clone

- Developed a Pinterest-inspired full-stack web application with secure authentication, image uploads, and responsive UI using Node.js, Express.js, and MongoDB. Built REST APIs for managing posts, user interactions, and dynamic content rendering.

Todo App [🔗](#)

- Developed a Redux-based Todo application with task filtering, persistent localStorage support, and responsive UI.

SKILLS

- Frontend: HTML, CSS, JavaScript, TypeScript, ReactJS, Bootstrap, Redux Toolkit
- Backend: Node.js, Express.js, PHP, MySQL, MongoDB, REST APIs
- Programming Languages: C, C++, Java, Python
- Tools: Git, GitHub, VS Code
